INFORMED CONSENT FOR PHILIPS **ZOOM WHITESPEED TEETH WHITENING**

TREATMENT INTRODUCTION

My dentist has informed me that my teeth are discolored and could be treated by in-office whitening. This information has been given to me so that I can make an informed decision about having my teeth whitened. I have the right to ask questions about any procedure before agreeing to undergo the procedure.

DESCRIPTION OF THE PROCEDURE

Zoom in-office tooth whitening is a procedure designed to lighten the color of my teeth using a combination of a hydrogen peroxide gel and a specially designed visible LED light lamp. The Zoom treatment involves using the gel and lamp in conjunction with each other to produce maximum whitening results in the shortest possible time. Before and after the treatment, the shade of my upper-front teeth will be assessed and recorded.

ALTERNATIVE TREATMENTS

I understand there are alternative treatments for whitening my teeth for which my dentist can provide me additional information. These treatments include: Other In-office Whitening Treatments, Take-Home Whitening Kits, Porcelain Crowns, Veneers or Composites.

RISKS OF TREATMENT

I understand that:

- existing issues should be treated before undergoing a whitening procedure.
- results will vary or regress due to a variety of circumstances.
- Zoom whitening treatments are not intended to lighten artificial teeth, caps, crowns, veneers or porcelain, composite or other restorative materials, and that these types of restorations may need to be replaced at my expense to match my newly whitening teeth.
- darkly stained yellow or yellow-brown teeth frequently achieve better results than people with gray or bluish-gray teeth.
- Teeth with multiple colorations, bands, spots due to tetracycline use or fluorosis do not whiten as well, may whiten unevenly, may require additional whitening, or may not whiten at all.
- Those with porcelain fused to metal crowns, amalgams, lingual bars or implants may feel excessive heat.
- teeth with many fillings or cavities may not lighten and are usually best treated with other non whitening alternatives.

RESULTS CANNOT BE GUARANTEED.

I understand that in-office whitening treatments are considered generally safe by most dental professionals.

potential complications and risks of Zoom treatment can be explained to me by my dentist and I understand that more information on this will be provided to me upon my request. Since it is impossible to state every complication that may occur as a result of Zoom treatment, the list of complications in this form is incomplete. The

basic procedures of Zoom treatment and the advantages and disadvantages, risks and known possible complications of alternative treatments have been explained to me by my dentist and my dentist has answered all my questions to my satisfaction.

SIGNATURES

By signing this document in the space provided I indicate that I have read this informed consent (or it has been read to me), I fully understand the entire document and the possible risks, complications and benefits that can result from the Zoom treatment, and that I give my permission for the Zoom treatment to be performed on me.
